9" IND SAFETY LEVER ANGLE GRINDER

Brand: Toku Product Code: TAG900QJL

9" IND SAFETY LEVER ANGLE GRINDER

9" Industrial safety throttle lever angle grinder - Made in Japan! Features a powerful motor and is lightweight and easy to handle, comes with a female wheel mount for added security when using either grinding wheels or cutting off discs - manufactured for durability!

The tool features a safety throttle lever design and a silenced 360 degree rotatable exhaust, giving the operator ability to direct the exhaust air away from them, no matter what position the tool is used in. Also features a speed governor to ensure speed control is maintained. The easy to operate safety trigger makes it a breeze when using the tool with gloves.

Due to the unique wheel mounting design, the standard tool delivery can accept both standard thickness and thin depressed centre grinding wheels, and cutting off discs without the need for optional wheel flanges, making it safer and easier to use right out of the box!

This is a very powerful tool in a compact body and is sure to please! This tool is a favourite with our heavy industrial manufacturing, construction and mining customers and we are confident you will agree!

As with all of our industrial products, we offer technical and spare parts support to ensure your investment in our imported product(s) is a wise one.
